

How it Works

Step 1

This is the initial consultation where you tell us your must-haves and overall vision. We will discuss possible layouts and budget, and create a first draft design that is tailored specifically for you.

Step 2

More collaboration to finalize your design and draw up your contract. We will generate an estimate, and as soon as the deposit is collected, we can get your project on the calendar and discuss projected timelines.

Step 3

This is where we start turning your design into reality! We will be in constant communication, sending updates on timelines, subcontractor schedules, and all other pertinent information regularly.

Step 4

Site clean-up and punch list items are completed. Final walk-through is done to ensure your standards and satisfaction have been met, and we hand you the keys to your new - or newly-improved - home!
